

Grounds maintenance

Suffolk Coastal Services is a member of the British Association of Landscape Industries (BALI)

Our staff are well trained and qualified. Where relevant staff hold NPTC certificates in the safe use of pesticides.

“ your member of staff is most conscientious and takes a real pride in his work and the results are greatly appreciated ”

(a comment received from a local church for whom we carried out hedge maintenance works)

“ the work you have carried out is very good indeed and the appearance of the site is much improved ”

(a comment from a property developer after we took over maintenance of one of their developments)

We provide a range of grounds advice and maintenance services to the private and public sector in East Suffolk.

Each year we design the formal bedding schemes for the Felixstowe sea front gardens, including the award winning 3-D displays. We are experienced in choosing species which will thrive in our local climate and we can also advise clients on the use of native species, to benefit wildlife.

We maintain shrub beds around industrial and residential estates, to provide a pleasant environment for visitors and residents. We can also carry out litter clearance and path sweeping, to ensure that sites are well maintained.

We provide an arboricultural service and can carry out a full range of tree works for our clients.

Our high quality services are competitively priced. Our clients range from the owners of large stretches of industrial and public land in East Suffolk, to residential property agents and numerous private individuals and local organisations.

Awards

Each year we support our local District and Town Councils to achieve numerous, and often prestigious, successes in the Anglia in Bloom Awards.

Our staff have won FA awards for their skills in groundsmanship.
