

Arboricultural services

Our clients can be confident that...

...all the work we undertake on their behalf is carried out to the British Standard 3998 'Recommendations for Tree Surgery'

...our climbing arborists are fully qualified, experienced, equipped and competence certificated

...all our works meet local Planning requirements

...our entire operation is covered by Third Party Public Liability insurance to the value of £10 million

.....all tree wastes are removed, chipped and re-cycled in an environmentally sustainable manner

...written risk assessments are carried out before tree surgery begins

We provide a complete range of tree services to both the public and private sectors across the boundaries of Suffolk and Norfolk and our professional team is able to offer a complete solution to all your tree management needs.

Our customers range from the owners of large estates, both public and commercial organisations and private households. We appear on a number of local authority approved contractor lists. From the first point of contact we provide sound impartial advice that will assure you peace of mind. Your trees are an asset and with our assistance they need not be a liability.

We care about what we do and the service we provide. Our main aim is to help you maintain a healthy tree stock through remedial pruning, however, when required, we are experienced in tree felling and canopy reduction, particularly in confined spaces.

Our complete tree service also includes tree stump removal and tree planting and we have a good track record of establishing larger specimen trees.

Customer Care

We are customer focused and ensure our service to you is communicated in a clear, understandable manner. Our professional services are of the highest quality, yet competitively priced and quotations are provided free of charge
